PENTAX **Personal Skin Designer** powered by DigiBook
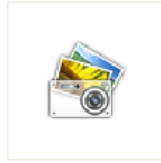

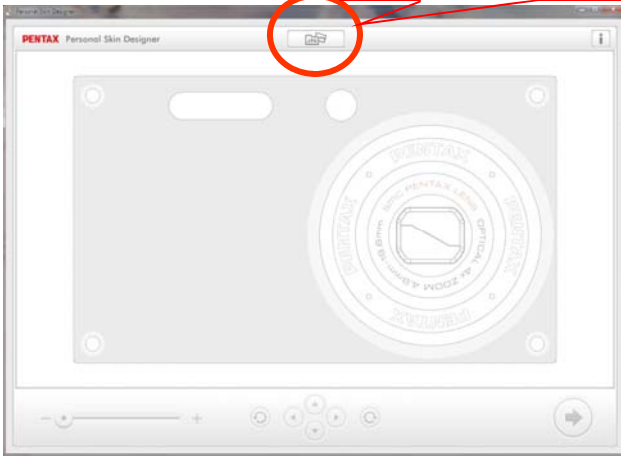

1. To open the PENTAX Personal Skin Designer Software, double-click on the application icon on your desktop.
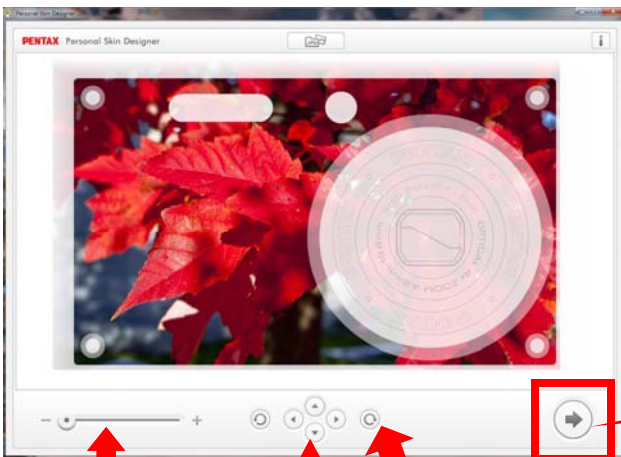

Personal Skin Designer

2. To search for a JPEG image that you want to use in your design, click on the "JPEG" button.

3. When you click on the "JPEG" button, a new window will open that will allow you browse for images on your desktop. Once you have selected the image you want to use in your design, click "Open".

4. On the Edit Screen, you can zoom in and adjust the alignment and direction of the image by using the buttons at the bottom of the screen
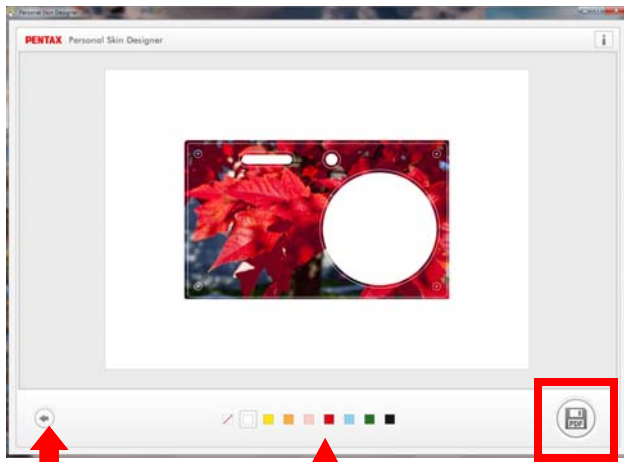

5. Click on the "NEXT" button when you have finished editing your design.

Zoom Scroll Bar

Image Rotation Button

Image Alignment Buttons

"NEXT" Button
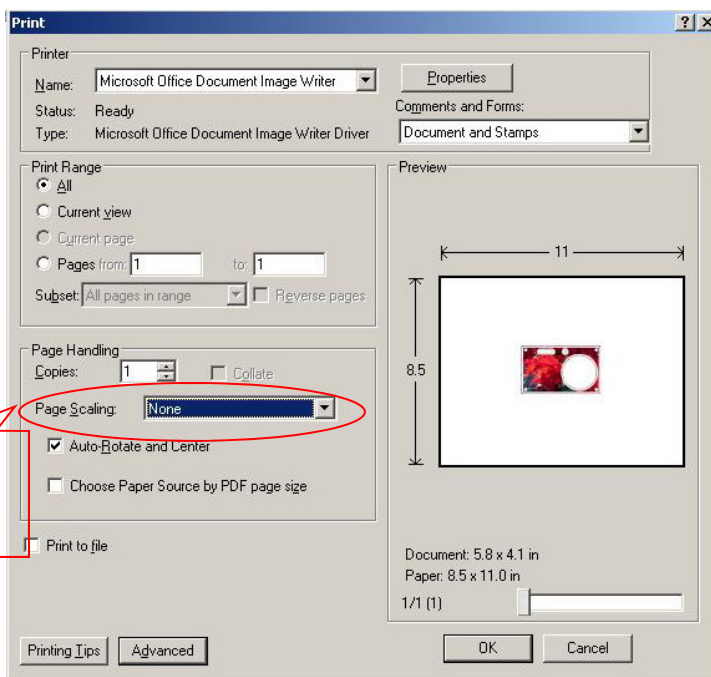

6. On the Preview Screen, you can see how your printed design will look. You can also add edge lines to your design.

If you're not completely happy with your design, you can click the "BACK" button to go back to the Edit Screen.

If you are happy with your design, click on the "PDF" button to create a PDF file of your design.

Once the PDF file has been created, you can exit PENTAX Personal Designer

"BACK" Button
to go back to
the Edit Screen

Color Palette for edge lines
Choice of 8 colors or no line
[No line by default]

"PDF" Button

7. To print your design, open the PDF file that you just created using PENTAX Personal Skin Designer.

To ensure that the image printed is the correct size, please make sure that Page Scaling is set to "None" before printing.

Make sure that Page Scaling is set to "None" before printing

8. Cut out the design using the Optio RS1000 Tracing Stencil.

9. Place the design sheet between the body and the transparent front panel of the Optio RS1000.
